## FULL STACK ENGINEER

A results-driven, detail-oriented fullstack engineer and mentor with 5 years of experience. Experienced in design, development, and maintenance of front- and back-end components in a variety of products, including big data dashboards, serverless lambdas and complex front end interfaces.  I provide elegant, reliable, thoroughly-tested solutions to complex problems, identifying inefficiencies and improving processes. Experienced in managing small teams in an agile context, experienced with teaching and lecturing to full stack students.

## TECHNICAL SKILLS

- Languages / tools: JavaScript (ES6), MongoDB,  PostgreSQL, React, Angular, Redux, Node js Python & more.
- Experienced in: Serverless Lambdas, JS-frameworks, advanced DOM manipulations, Express js,  monorepo architecture tools

## EMPLOYMENT  HISTORY

**Demostack,** Full stack developer (2021 - 2022)
Demostack is a startup company, developing a unique product that offers customized demos for products in development. This means that the product goes through a process which concludes with a partial replica of the origin - a "demo".  As a full stack developer, I was in-charge of leading and developing complex features with advanced DOM manipulation, working mainly with react and node JS.

- Develop serverless Lambdas (TS, Node js)
- Develop complex dashboards and ui components from scratch, also lead teams of remote/local employees for efforts of building those features (JS/React/Next js).
- In charge of the entire testing process of the FE department - including research - comparing testing frameworks, ci/cd tools, and eventually designing a full testing system for the company, with ci/cd hooks and parallel testing. Give lectures to the company about the essence of test driven development and different testing attitudes (Cypress js, Selenium, circle ci,github actions).

**Nuweba,** front end developer (2020 - 2021)
Startup company developing a serverless as a service, or "FaaS" product.

- Developed static sites and product ui (React, Gatsby)

**Experis,** Full stack lecturer (2020 - 2021)
Full stack course lecturer, teaching Javascript, React and Node JS to students

**Herolo/Lawyal/Elbit Systems EVS,** Front End Angular Developer (2019 - 2020)
Herolo (now Abra) is the largest company for providing front end as a service in israel. I took part in multiple projects, the main ones were joining an elbit systems team product for finding defects in fabric and developing a big data system for managing lawyer offices from scratch.

- Created complex dashboards and pie charts for a project with elbit systems EVS (Angular, chart js)
- Important role in lawyer office management platform project, planning the tasks and features in an agile methodology context, eventually leading the Israeli team. **(**Angular, Jira)

**Dweb,** Front End Angular Developer  (2018)
As a result of my high grades in class, I was selected by the course's main lecturer to be involved in a personal project of his, developing an online dating app for orthodox jewish community.  **(**Angular, Firebase)

**IDF** - Three years of full army service in the IDF as a combat medic (2014 - 2017)

## Education

**John Bryce** ﹕full-stack web development course in John Bryce, ranked 1st in class.   GRAD: 2018
